

# MB Products – Gear oil restock

WELL WE DIDNT EXPECT THAT

It was only a few months ago that we launched our new MB-S Semi synthetic multi grade gear oil and WOW we've sold out already!

Well that was totally unexpected.

So we've had another batch specially made, a pallet load arrived to stock us up and it's selling again. Thats lots of oil.

What we are seeing is people just adds a bottle with an order every now and then, this adds up – which is what it's all about – sales – it keeps us going – little fingers in little pies!

We see so many Scooters coming in with hardly any oil in the gear box or if it's got any it's Black oil and bits of metal and clutch plate material!

Theres one thing for sure with a Lambrettas the gear oil needs changing regularly. The old stuff burns away – even the 60's manual tells you that. Keeping regular fresh oil looks after you're internals.
