

MB Products – Race-Tour Badge

New Lambretta Race-Tour badge.

We've already made and shown you our MB Scooters Race-Tour 195/200/225/230 badges in Stainless steel and Alloy.

I showed them to our French friend Gilles when he visited us a few months ago and he said 'he's not allowed to fit a tuning part to his bike in France'. Arghh – okay I listened and thought how about if I take off the numbers is that okay? – The answer was yes I'll buy 3 for my road bike!

So here they are – Alloy 'Race-Tour' badges with no engine size. These are 100mm long, perfect to put above or below your existing leg shield badges. Perfect to put near your side panel badges or anywhere else you want.

To fit, you simply put them where you want, mark the holes, drill the holes, push and hold the alloy rivets in place and tap the back of the rivet to peen them over! Easy, you can polish the little alloy head afterwards. You can find them on the webshop [here](#)
